

THE ADDED VALUE OF A SAPPHIRE POOL

All Sapphire Pools' Swimming Pool Packages include: Delivery, Excavation, Installation, Cranage, Pump, Filter, Salt Water Chlorinator, Handover Kit, Under Water Light, Electrics, Chemical Balance, Instruction and Clean.

PLUS they also include the following **ADDED VALUE:**

1. WA MADE - CERTIFIED STRUCTURAL SWIMMING POOL, CONSTRUCTED WITH POOL GRADE FIBREGLASS (NOT MARINE)

All of our pools are engineer certified and constructed with full 200mm edgebeams, full depth walls and full size structural ribs. This means we DO NOT need a concrete bond beam or sand and cement backfill to make our pools comply. Others would have you believe they do this to make their pools better - the fact is, their pools do not comply structurally without adding concrete and cement. This is why we can offer you a Lifetime Structural Guarantee.

2. LIFETIME STRUCTURAL WARRANTY

We are a Product Certified Company licence number 1906. This means that you have the peace of mind that your pool is built to the Australian Standards because our pools have been tested by an Independent Auditor. We are proven to build to the Australian Standards - we don't just say we do. Always ask if your pool builder is product certified. Our pools are manufactured in the only factory in WA that has a gelcoat manufacturing facility, guaranteeing you better value for money. This is all overseen by an on-staff Industrial Chemist batching the gelcoat on a daily basis to the ambient conditions, ensuring the perfect curing result.

3. MICROTECH ANTI-MICROBIAL POOL PROTECTION

Microtech is added in the manufacturing process to guard against bacteria. The Antimicrobial additive protects your pool against bacterial ingress. Anti-microbial treatments have no fade resistant qualities as others may claim.

4. SURFACE FINISH UPGRADE TO DECRAFLEC

This surface finish is the equivalent to all our competitors "top of the range" surface finishes. It has UV inhibitors and fade resistance qualities and comes with a 7 Year warranty.

5. SELF-CLEANING SALT WATER CHLORINATOR CELL

Calcium build-up is the most common cause of cell failure in your salt water chlorinator. We include a self-cleaning cell as standard with a value of \$300 to minimise the number of times you are required to clean the cell thus extending the cell life of your salt water chlorinator.

6. LED LIGHT UPGRADE

This is an Australian made light with a 70,000 hour running life and extra bright performance, not a cheap Chinese imported light.

7. UPGRADED ELECTRICAL RUN

The standard electrical connection under the terms of the SPASA Contract is 20m. We include 40m of electrical connection run back to the main switchboard on an isolated circuit with an RCD for your protection and two double weather-proof GPO's.

8. UPGRADED SUCTION LINE

Generally speaking pumps "push" water they do not "pull" water so the less friction there is between the skimmer box and the pump the more efficient the pump is. By upgrading the suction line from the standard 40mm to 50mm we increase the efficiency of the pump.

9. INCLUSIVE WARRANTY ON STANDARD POOLS:

Surface Finish: 7 Years Structural: Lifetime

10. INCLUSIVE WARRANTY ON POOL COLOURGUARD POOLS:

Surface Finish: Lifetime Structural: Lifetime

TOTAL TRUE VALUE **\$3,190**
