

Super New High Performance **Eco-friendly Fibreglass**

E6 Corrosion Resistant Enhanced Glass Fiber is a revolutionary new product developed by the Jushi Group that significantly enhances product performance.

The many benefits of this technical breakthrough in fibreglass technology to the pool buyer include:

- Improved strength - pools are up to 20% stronger
- Increased elastic modulus (stiffness)
- Increased flexural strength
- Dramatic improvement in corrosion resistance - say goodbye to osmosis
- Greater temperature resistance - better for solar heated pools
- Environmentally friendly - Boron-free, Fluorine-free. Waste emissions in production are reduced by 80%, with zero waste water discharge during glass production.

Every Sapphire pool is made using this amazing new product and is manufactured, processed and supplied to comply with Australian Standard 1838 under license number BMP520101.

Invest in the very best swimming pool available – a pool built stronger to last longer from the team at Sapphire Pools.

Enjoy life!
Enjoy a
Sapphire
pool!
